PROFILE

I am a qualified and purposeful frontend developer. I always try to improve myself and follow the latest technologies. Experienced with React, TypeScript, Redux, Express.js, MongoDB, Firebase, Git and other various technologies.

EDUCATION

- **Software Engineering (Bachelor's Degree)**
  Lviv Polytechnic National University (2021 - 2025)
- **IT Step Academy** (2016-2021)
- **React course on Scrimba** (online, 2022)

EXPERIENCE

September 2022 - Present
Teamvoy l Ukraine, Lviv
Junior React Native Developer

While working as a Junior React Native Developer, I have took part in 2 projects and i was responsible for:
- Maintaining an existing project, that was already in production
- Implementation of new features such as geofencing, bluetooth connection, voice recording and its playback on an IoT device
- Rewriting legacy code
- Refactoring and bug fixing

In addition, I built several pet-projects such as **Instagram clone,** which implemented the main functionality of real Instargram and **Game store,** that includes authentication, search bar, user settings and other features.
Technologies: React, TypeScript, Redux Toolkit, Firebase and others.
